-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: on line 14 of page 9, the term "FIG. 1" should be changed to --FIG. 4--.

Appropriate correction is required.

### *Claim Objections*

2. Claim 13 is objected to because of the following informalities: It is unclear whether it was the intent of the applicant to have this claim as a dependent claim or an independent claim. It has been examined as a dependent claim in its current form. If the applicant wishes the claim to be a dependent claim then the preamble needs to match the preamble of claim 1. If the applicant wishes the claim to be an independent claim then the applicant should replace the phrase "device according to claim 1" with the actual content of claim 1. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Melnyk.

Melnyk (Figures 1 and 3, col. 2 lines 13-41, abstract) discloses a motorized vehicle (not shown)

Art Unit: 3672

having a trailer hitch. There is an auger (3) capable of drilling post holes attached to the rear of the vehicle by virtue of a horizontal frame member (12). The trailer hitch has a square hole.

5. Claims 14 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Skarlupka, IV et al. Skarlupka, IV et al. (Fig. 1, paragraph 70) discloses a motorized vehicle (24) having a trailer hitch (22). There is an auger (26) capable of drilling post holes attached to the rear of the vehicle by virtue of a horizontal frame member (20a). The trailer hitch has a square hole.

***Allowable Subject Matter***

6. Claims 1-12 are allowed.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The pre-grant publication to Rust et al., Nolin, Kuhl and Bowers et al. all show similar features to those of the present invention.
